General Specifications

Worksurface: Worksurfaces are 1-1/4" thick, three ply engineered wood construction with .050" high pressure laminate top and a phenolic backer sheet. The front edge is banded with 3mm PVC. Tops are attached to the side and back panels with (3) steel "Z" brackets. Worksurface includes a wire management grommet.

End and Intermediate Panels: End and intermediate panels are 1" thick thermally fused laminate. All exposed edges are banded with 3 mm PVC. Double faced study carrels share a common back panel. Panels may also be specified at 32"H. Panels have embedded threaded metal inserts to accept machine threaded connecting hardware for metal-to-metal fastener contact. Each panel is equipped with an adjustable glide(s). Post and panel models include 14-gauge powder coated steel tubing with adjustable glides.

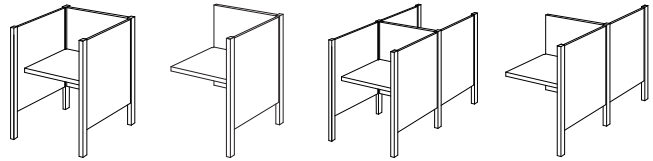

The standard worksurface height is 29". Adjustable height may be specified. Carrels are designed modularly and may be disassembled and reconfigured. Adder units are similar to initial units but substitute one intermediate panel for two end panels.
