# Features & Benefits:

- ContourMAX™ Lumbar features a layer of memory foam that adjusts specifically to the curves and angles of any individual's body. Four Highly durable Thermoplastic Elastomer (TPE) modules, consisting of 64 individual responsive branches, lay beneath the foam and shift themselves according to the shape and movement of the user's back.
- VertaAir™ Seat is equipped with 8 hexagonal air pillars. These pillars host air tunnels with 4-way air emission tunnels, emitting air in and out to provide breathability and pressure relief on your sit bones for a healthy back.
- Hygenx™ is a patented coffee ground nanotechnology in breathable cloth to deliver natural odor control with quick-dry functionality and silver-coated embroidery to neutralize bacteria growth.
