

General Specifications

Table tops: 1-1/4" thick, three-ply 45# particleboard construction with a .050" high pressure laminate top surface and a .030" phenolic backer. Corners for rectilinear tops: square corners on banded tops have a 1/8" radius.

Worksurfaces: Top worksurface is 18"D, lower worksurface is 24"D. The lower worksurface height on the Dual Surface Z Table is 25.5"H. Edges are 3mm PVC with a 1/8" radius top and bottom. 3" diameter covered wire management grommet(s) standard in the top work surface. Top includes (1) cabling grommet per user space.

Steel Spanner Worksurface Support (Dual Surface Z Table Only):

Steel support is constructed of 1" x 1" 14 gauge steel tubing with through holes for attachment to lower worksurface. Includes recessed star inserts on each end of the spanner. Unit attaches to end frame assemblies via 1/4"-20 flat head bolt.

End Frame Assembly: Steel end Frames are weldments consisting of 14 gauge 1 1/4" diameter curved steel tube legs, a curved 3/4" diameter arched spanner and a 1/4" x 6"W steel mounting plate. Legs are fitted with decorative adjustable glides that screw into threaded welded inserts and whose height allows them to be replaced by casters without modifying leg length.

Modesty/Wire Management Panel: Panel is constructed of 18 gauge steel and is attached to the underside of the work surface with #10 x1" wood screws and is bolted to the "End Frame Assembly" uprights with #10-24 button head machine screws. The lower part of the panel is bent to form a wire management channel. For Z tables: panel is attached to the underside of the upper work surface.

Finish: See **mediatechnologies** Finish and Color Guide for choices.
