

Drift Picture Book Shelving

Bookcases

General Specifications - Drift Picture Book Shelving

End/Intermediate Panels: All end and intermediate panels are un-detailed 1" engineered wood with high pressure laminate on both faces; exposed edges are banded with 3mm PVC with edges and corners radiused 1/8". All panels permit shelf adjustment on 32mm increments. Intermediate panel is machined on both faces. Threaded 5/16-18 metal inserts are embedded into the top and the bottom of the starter panels to facilitate attachment brackets for mounting of the top panel and base shelf. One (1) mobile curved shelving unit is constructed of two (2) end panels and one (1) intermediate panel.

Top: The 60° curved top panel is 1" thick engineered with high pressure laminate faces. The edges are banded with 3mm PVC. The back edge of the panel is dadoed to contain the curved back panel. The top is attached with mounting brackets.

Base: The 60° curved base is 1" thick engineered wood with a high pressure laminate face and a .030 phenolic backer; exposed edges are banded with 3mm PVC with edges and corners radiused 1/8". The back edge of the base is dadoed DRIFT to contain the curved back panel. The base is fastened to the vertical panels with mounting brackets. 75mm locking swivel casters with thermoplastic elastomer treads are bolted to the bottom of the base using 5/16" - 18 machine bolts. Casters are located at the four corners and at the midpoint of the convex curved edge of the base. Attached curved steel support at the rear of the shelf supports the Picture Book Divider panel.

Adjustable Shelves: The 30° curved adjustable shelves are veneer core 1" nine ply hardwood plywood with high pressure laminate faces; exposed edges are banded with 3mm PVC with edges and corners radiused 1/8". They are bored in 4 locations on the underside to accept seismically rated shelf pins. Attached curved steel support at the rear of the shelf supports the Picture Book Divider panel.

Picture Book Divider: 1/4" thick MDF Divider panels cut to shape with high pressure laminate on both faces and clear coated edges

Back Panel: Engineered wood backs are 1/4" thick with high pressure laminate on both faces (DFT) or curved 14-gauge perforated powder coated steel panel (DFTS). Starter units: are one complete bookcase or the beginning of a run; they include two end panels, a top, and a back.

Single-Faced - Picture Book Shelves - HIGH PRESSURE LAMINATE CONSTRUCTION - Perforated Metal Back - Ships Assembled
